

MUHAMMAD ABDULLAH WASEEM

MERN Stack Developer | AI-Integrated Applications

Lahore, Pakistan • +92 327 0256089 • muhammadabdullah121254@gmail.com • [Portfolio](#)

PROFILE

MERN Stack Developer building real, verifiable full-stack and AI-integrated projects — from a production factory-management system for an operating manufacturing business, to AI agent systems, computer vision, and real-time applications. Comfortable owning a project end-to-end: system design, infrastructure debugging, and deployment.

EXPERIENCE

Full-Stack Developer (Family Business Systems) — *Hafiz Bags — Bag Manufacturing (est. 1993)* (2025 – Present)

- Architected and am building a factory management system (React Native/Expo, Node/Express, MongoDB Atlas) covering payroll and audit workflows for an operating manufacturing business.
- Owned full system design end-to-end: PRD, environment setup, and infrastructure debugging (ISP-level DNS blocking of MongoDB SRV, Node/Expo version conflicts) to get a real deployment running on real infrastructure.

PROJECTS

Upwork Proposal Generator — *CrewAI, RAG (ChromaDB), Jinja2, Groq/Gemini, Streamlit* ([GitHub](#))

- Multi-agent system (CrewAI) that generates tailored Upwork proposals using a retrieval-augmented generation pipeline over a ChromaDB vector store, with Jinja2-templated prompt construction.

Vehicle Damage Detection System — *ResNet-50, PyTorch, FastAPI, Streamlit* ([GitHub](#))

- Image classification system for detecting and categorizing vehicle damage, served via a FastAPI backend with a Streamlit interface.

Sharpen Prompt — *Electron, Vite/React, Node.js Proxy Server, Gemini API*

- Cross-platform prompt-optimization tool (ships as web, desktop .exe, and Android .apk) with a Node.js backend proxy that translates requests to the Gemini API, keeping the frontend provider-agnostic.

Nex-Link — *Node.js, Express, MongoDB* ([GitHub](#))

- URL shortener service with link generation, redirection, and persistence.

Real-Time Chat Application — *React, Node.js, Socket.io* ([GitHub](#))

- Bi-directional messaging app with WebSocket-based instant delivery, built to handle multiple concurrent users.

3D Solar System Explorer — *Three.js* ([GitHub](#))

- Interactive 3D visualization of the solar system with orbital mechanics and camera controls.

SKILLS

AI / Agents: CrewAI, LangChain, RAG, Vector Databases (ChromaDB), Prompt Engineering, Groq API, Gemini API

ML / CV: PyTorch, ResNet-50, FastAPI, Streamlit

Frontend: React.js, React Native (Expo), Redux Toolkit, Context API, Tailwind CSS, Bootstrap, Three.js

Backend: Node.js, Express.js, RESTful APIs, Socket.io (WebSockets), JWT & Bcrypt Auth

Database: MongoDB, MongoDB Atlas, Mongoose

Languages: JavaScript (ES6+), Python, C++, HTML5, CSS3

Tools: Git, GitHub, VS Code, Postman, Vercel, Render, Netlify, Streamlit Community Cloud

EDUCATION

BS Electronics — Government College University, Lahore (GCUL) (2026 – 2030)

Certificate in Full Stack Web Development (MERN) & AI — Nexskill, Arfa Software Technology Park, Lahore (2025 – 2026)

Intermediate in Computer Science (ICS) — Punjab Group of Colleges, Lahore (2024 – 2026)
